Programmer with experience in front-end development, web developer, web designer, and the implementation of artificial intelligence (AI) technologies. My skills include HTML, CSS, JavaScript, as well as modern frameworks like React.js and Next.js. Experienced in creating responsive and intuitive user interfaces.

## Work Experience

### Machine Learning Support Engineer

Mar 2022 - Apr 2025

Labelbox

- Provided technical support and debugging assistance for users of Labelbox's AI data labeling platform.
- Collaborated with cross-functional teams (engineering, support, ML) to resolve complex issues and improve tooling.
- Authored internal documentation and troubleshooting guides that reduced resolution time by 30%.
- Synthesized user feedback to define requirements and inform product enhancements.

### Front-End Engineer (Remote)

Jan 2023 - Dec 2024

Hugging Face

- Built and maintained scalable front-end interfaces for Hugging Face's AI tools using React.js, TypeScript, and Tailwind CSS.
- Wrote clean, efficient, and well-tested TypeScript code; used Jest and manual testing workflows for validation.
- Participated in code reviews, gave constructive feedback to contributors, and maintained internal documentation.
- Collaborated with cross-functional teams and open-source communities to implement feedback-driven UI improvements.
